

S/NO	NAME	TYPE	USE CASE	WEBSITE	TWITTER
1	GNOSIS SAFE	INVESTING	Gnosis Safe is a smart contract wallet running on Ethereum that requires a minimum number of people to approve a transaction before it can occur (M-of-N). Gnosis Safes are commonly used to manage pooled DAO funds. DAOs often require a certain number of members to sign off on any fund transfers. DAO actions are generally voted upon by all members and then executed by the core group of signers.	https://gnosis-safe.io/	https://twitter.com/gnosisSafe
2	SYNDICATE	INVESTING	Syndicate is a decentralized investing protocol and social network that enables investors and communities to create Web3-native investing DAOs. Syndicate also provides infrastructure and tools for investing DAOs to socially network, invest in the real world, and maintain compliance	https://syndicate.io/	https://twitter.com/SyndicateDAO
3	OPEN LAW	GOVERNANCE	OpenLaw is an online legal contracts portal which provides users with a blockchain-based protocol to create 'smart' legal documents. The OpenLaw platform can be used to create smart contracts and record them on the Ethereum blockchain.	https://www.openlaw.io/	https://twitter.com/openlawofficial
4	SNAPSHOT	GOVERNANCE	Snapshot is a decentralized voting system that allows users to create proposals and vote off-chain. Snapshot allows users to choose from multiple voting systems and use ERC-20s or NFTs to calculate voting power.	https://snapshot.org/	https://twitter.com/SnapshotLabs
5	TALLY	GOVERNANCE	Tally is a voting and governance analysis tool that allows members of a protocol DAO (e.g. Compound, Uniswap, or Gitcoin, etc.) to vote on active on-chain proposals, delegate votes to a third party, or view previous proposals. It also shows the outcomes of previous proposals, allowing the public to see who voted; what percentage of voting rights they own; and whether they voted for, against, or abstained from a proposal, bringing transparency to the voting process. Users can see governance activity across all the DAOs they're participating in on their dashboard.	https://www.withtally.com/	https://twitter.com/voteWithTally
6	RABBITHOLE	RECRUITING	Rabbithole allows users to discover and use new decentralized apps (d'apps), protocols, or crypto platforms in return for cryptocurrency rewards. Partners can use Rabbithole to distribute tokens to users through proof-of-use and acquire knowledgeable and engaged new users. It also offers crypto tutorials in topics like NFTs and DeFi with Proof Of Attendance Protocol (POAP) so users can demonstrate their knowledge of specific topics.	https://rabbithole.gg/	https://twitter.com/rabbithole_gg
7	SMART INVOICE	TREASURY MANAGEMENT	Smart Invoice is a sophisticated invoicing tool that handles payments between organizations (which are also called "clients"), and freelancers (which are also called "providers"). Smart Invoice establishes a set of shared expectations between a client and a service provider who are engaged in business with one another.	https://smartinvoice.xyz/	https://twitter.com/RaidGuild
8	SUPERFLUID	TREASURY MANAGEMENT	Superfluid is a real-time payments tool that enables programmable and streaming payments. Superfluid provides developers and end-users alike the ability to pay and be paid in a more automated, customisable and seamless manner than conventional banking and FinTech.	https://www.superfluid.finance/	https://twitter.com/Superfluid_HQ
9	PARCEL	TREASURY MANAGEMENT	Parcel is a treasury management and compensation tool that can manage fund outflows for a DAO. Parcel works with over 200 DAOs (as of Dec 2021), including prominent ones like FWB, Compound Grants and Aave Grants DAO.	https://parcel.money/	https://twitter.com/parcelHQ
10	UTOPIA	TREASURY MANAGEMENT	Utopia is an app that attaches to Gnosis Safes and allows DAO managers to set recurring payments (e.g. salaries), receive payment/refund requests from members, and create an annotated transaction history for approved and rejected payments.	https://www.utopialabs.com/	https://twitter.com/utopialabs_
11	LIAMA	TREASURY MANAGEMENT	Llama provides treasury management as-a-service for DAOs.	https://www.liama.xyz/	https://twitter.com/lamacommunity_
12	GNOSIS SAFE	TREASURY MANAGEMENT	Gnosis Safe is a smart contract wallet running on Ethereum that requires a minimum number of people to approve a transaction before it can occur (M-of-N). Gnosis Safes are commonly used to manage pooled DAO funds. DAOs often require a certain number of members to sign off on any fund transfers. DAO actions are generally voted upon by all members and then executed by the core group of signers	https://gnosis-safe.io/	https://twitter.com/gnosisSafe
13	RABBITHOLE	MARKETING	Rabbithole allows users to discover and use new decentralized apps (d'apps), protocols, or crypto platforms in return for cryptocurrency rewards. Partners can use Rabbithole to distribute tokens to users through proof-of-use and acquire knowledgeable and engaged new users. It also offers crypto tutorials in topics like NFTs and DeFi with Proof Of Attendance Protocol (POAP) so users can demonstrate their knowledge of specific topics.	https://rabbithole.gg/	https://twitter.com/rabbithole_gg
14	MIRROR	MARKETING	Mirror is rebuilding publishing for Web3. Mirror allows users to create a publication on the blockchain. As a publisher, you can launch a crowdfund, launch an NFT, turn your post into an NFT, collect tips, split proceeds across contributors, and participate in the crypto economy.	https://mirror.xyz/	http://twitter.com/viamirror
15	BIP	KNOWLEDGE MANAGEMENT	Bip is a community workspace with Git-editable documents and deep integrations with modern community spaces, such as Discord and Slack. Bip features include bots to export insightful community conversations, contributor leaderboards, permissions management, and social-driven discovery of new projects.	https://bip.so/	https://twitter.com/bip_so
16	CLARITY	KNOWLEDGE MANAGEMENT	Clarity is a knowledge management platform that mashes up features of Notion, Discord, and Slack, without all the clutter.	https://www.clarity.so/	https://twitter.com/clarityteams
17	JUICEBOX	FUNDRAISING	Juicebox is akin to a decentralized Kickstarter, allowing projects to raise funding from the community all powered by public smart contracts on Ethereum. Using its platform you can: design your fundraising page, set up your funding structure, define how your project will distribute funds, and reward community members with tokens.	https://juicebox.money/	https://twitter.com/juiceboxETH

18	FAIRMINT	FUNDRAISING	Fairmint provides your company with a full-featured stakeholder backend to run and manage a Rolling SAFE offering. Fairmint's rolling agreement for future equity is an innovation on the classic SAFE created by Y Combinator 10 years ago. SAFE stands for Simple Agreement for Future Equity and is an agreement between an investor and a company that provides the investor with rights to future equity in the company without determining a specific price per share at the time of the initial investment. The Rolling SAFE is similar but allows for investment in a company at any time, with an implied valuation that grows automatically as more funds are raised. As of September 2021, Fairmint has raised \$5.8M on a rolling basis (representing 32% equity) since September, 2020 using their own product.	https://www.fairmint.co/	https://twitter.com/fairmintCO
19	MIRROR	FUNDRAISING	Mirror is rebuilding publishing for Web3. Mirror allows users to create a publication on the blockchain. As a publisher, you can launch a crowdfund, launch an NFT, turn your post into an NFT, collect tips, split proceeds across contributors, and participate in the crypto economy.	https://mirror.xyz/	http://twitter.com/viamirror
20	ASTRO	MULTI-FEATURE PLATFORM	Astro is a no-code DAO creation platform. Astro allows DAO members to create & vote on proposals, set bounties, and manage a treasury. Astro sets up the DAO on the NEAR blockchain, which has interoperability and bridges to other L1 blockchains.	https://twitter.com/AstroDao	https://twitter.com/AstroDao
21	MYCO	MULTI-FEATURE PLATFORM	Myco is an all-in-one platform that enables Digital Social Clubs to create digital media as a group and collectively own the economic rights associated with their actions.	https://www.myco.space/	https://twitter.com/mycodotspace
22	SOBOL	MULTI-FEATURE PLATFORM	Sobol maps accountability across your entire ecosystem so teams can move fast with alignment and trust. It focuses on people, so shows transparent structures by mapping all the roles and team members. It also connects goals and captures signed agreements	https://sobol.io/	https://twitter.com/teamsobol
23	UPSTREAM COLLECTIVES	MULTI-FEATURE PLATFORM	Upstream Collectives is a multi-feature platform that enables the set-up and operation of a DAO or any self-governed community, which it calls a "Collective".	https://upstreamapp.com/collectives	https://twitter.com/joinupstream
24	COLONY	MULTI-FEATURE PLATFORM	Colony is a flexible and easy-to-use framework for creating and running DAOs. It provides everything an organization needs to operate on-chain: Payments, Teams, Authority, Governance, Fundraising, Revenue sharing, Arbitration, and the ability to interact with any other smart contract on Ethereum.	https://colony.io/	https://twitter.com/joincolony
25	DAOhaus	MULTI-FEATURE PLATFORM	DAOhaus is a no-code platform for launching and operating DAOs, which uses the Moloch open source code. It includes functionality to: Launch, vote on, and process proposals. Monitor multiple treasuries, known as 'Vaults'. View members by number of shares and join date. DAOs have used DAOhaus software to raise more than \$50M and distribute almost \$20M	https://daohaus.club/	https://twitter.com/nowdaoit
26	ARAGON	TOKEN CREATION	Deploy a prebuilt Aragon organization leveraging templates for the most common use cases in as little as five minutes. Modular apps enable ongoing DAO management. Aragon consists of several products: Aragon Client, Aragon Govern, Aragon Court, Aragon Voice, and Vocdoni.	https://aragon.org/	https://twitter.com/aragonproject
27	ROLL	TOKEN CREATION	The Roll network mints branded digital tokens, which it refers to as social money. These tokens allow a creator to own, control, and coordinate the value they create across social media platforms and within their community. Tokens are minted on the Ethereum blockchain using the ERC20 standard.	https://tryroll.com/	https://twitter.com/tryrollhq
28	COINWISE	TOKEN CREATION	Coinwise is an open platform on Ethereum where creators can launch and build a tokenized community. Creators can: Create their own social token on a fixed supply, bonding curve or vesting schedule. Airdrop social tokens via a unique claimable link or to a list of addresses. Reward their community for contributions using bounties paid with community tokens or major coins including ETH and USDC. Provide vesting schedules for core contributors. Discover and grow their communities, communicate and contribute towards other creators	http://coinwise.co/	https://twitter.com/CoinwiseCo
29	POAP	TOKEN CREATION	POAP is an ethereum-based protocol that event organizers use to generate unique proof of attendance NFTs. Each NFT badge enables attendees to prove they were actually at the virtual or in-person event.	https://poap.xyz/	https://twitter.com/poapxyz
30	GARDENS	TOKEN CREATION	Gardens is a platform, created by 1Hive, that allows DAO members to submit, support or challenge proposals. To participate, DAO members must sign a Community Covenant, a document that states the rules, mission and vision of the DAO. Signing it signals that a member agrees with the values of the DAO and unlocks access to the governance features. Gardens uses 'Conviction Voting', a novel governance method that is based on the length of time that voters indicate their preference for a particular action, rather than requiring a yes/no vote. Proposals can be challenged and escalated to a dispute management system called 'Celeste', made up of a decentralized, randomly selected group of independent arbiters. DAO governance tokens can be generated using Gardens or imported.	https://gardens.1hive.org/	https://twitter.com/gardensdao
31	MIRROR	TOKEN CREATION	Mirror is rebuilding publishing for Web3. Mirror allows users to create a publication on the blockchain. As a publisher, you can launch a crowdfund, launch an NFT, turn your post into an NFT, collect tips, split proceeds across contributors, and participate in the crypto economy.	https://mirror.xyz/	http://twitter.com/viamirror
32	MEE6	COMMUNITY MANAGEMENT	MEE6 is a Discord bot-based service that can help DAOs manage their discord servers from inception to daily use, and through subsequent growth modes. MEE6 provides a broad range of functionalities in the form of bots and plugins, but the ones commonly used by DAOs include: Welcoming new members to their server Automatically assigning roles to new members after they accept the server rules. Moderating the server using pre-configured rules. Incentivizing member engagement through an experience & leveling system.	https://mee6.xyz/	https://twitter.com/mee6bot
33	RADICLE	COMMUNITY MANAGEMENT	Radicle is a platform that enables decentralized code collaboration. In other words, it provides Git-like peer-to-peer functionality without relying on trusted intermediaries. It also comes with Ethereum integration, which allows users to do things like linking their ENS name to their profiles, gaining access to Radicle funding, and even creating a DAO or linking their existing DAO to Radicle.	https://radicle.xyz/	https://twitter.com/radicle
34	ASTRO	COMMUNITY MANAGEMENT		https://astrodao.com/	https://twitter.com/AstroDao
35	UNLOCK PROTOCOL	COMMUNITY MANAGEMENT	Unlock is a protocol for memberships that lets creators monetize their work, on their own terms, without having to rely on 3rd party applications or platforms. This open-source protocol allows creators to integrate and build any kind of membership application.	https://unlock-protocol.com/	https://twitter.com/UnlockProtocol

36	WONDERVERSE	COMMUNITY MANAGEMENT	This DAO native tool is a platform which combines critical pieces to manage participation in a DAO. Primarily a project management tool integrated into crypto, it strives to be a one stop shop for all things DAO participation.	https://www.wonderverse.xyz/	https://twitter.com/wonderverse_xyz
37	DISCORD	COMMUNITY MANAGEMENT	Discord is a communication platform, akin to Slack, that allows for members to communicate over chat, voice, and video. Discord is the tool of choice for many web3 organizations to conduct internal discussions and interact with their communities.	https://discord.com/	https://twitter.com/discord
38	ORCA	COMMUNITY MANAGEMENT	Orca enables DAOs to implement pods. Pods give users a clean and easy-to-use UI to create and approve proposals within a small working group and allow DAOs to create organizational structure. From the user's perspective, a pod is a clean and easy-to-use interface for multi-signs. Under the hood, a pod is a Gnosis Safe with a light governance wrapper.	https://www.orcaprotocol.org/	https://twitter.com/OrcaProtocol
39	Collab.land	COMMUNITY MANAGEMENT	Collab.Land is a Discord bot that manages token-gated channels and roles. It includes functionality to: Verify whether a user owns a given digital asset (ERC token) necessary to enter a given channel or have a certain role, and if they do, give them access. Automatically kick a user out of a gated channel or role if they sell or otherwise get rid of the token required to be in it. Tip other users within a server.	https://collab.land/	https://twitter.com/Collab_Land_
40	GUILD	COMMUNITY MANAGEMENT	In less than a minute, create a private Discord space for a community based on an NFT, ERC-20 token, POAP, or a combination of them all. Let's say a user wants to connect community members around an NFT or token. In a few clicks, Guild enables users to spin up a token/NFT/POAP gated Discord channel for members. Members visit an organization's Guild page, connect their wallets, and if they hold that specific asset in their wallet, they will be granted access to the Discord. Users can also create a Guild that blends communities.	https://guild.xyz/	https://twitter.com/guildxyz
41	UNLOCK PROTOCOL	TOKEN GRATING	Unlock is a protocol for memberships that lets creators monetize their work, on their own terms, without having to rely on 3rd party applications or platforms. This open-source protocol allows creators to integrate and build any kind of membership application.	https://unlock-protocol.com/	https://twitter.com/UnlockProtocol
42	MINTGATE	TOKEN GRATING	MintGate is a platform that allows users to create new NFTs that can include unlockable content or generate gated links for token holders. Unlockable content is media that requires proven ownership of an NFT or social token in order to gain access. The platform also allows users to sell and buy NFTs using ETH. NFTs minted through MintGate are also available on Rarible. MintGate has just released a new product, which allows users to create their own branded NFT store, with MintGate's technology powering the backend. There are a few web3 solutions that offer token gating through different mechanisms - Guild for Discord, Orca for working groups and MintGate for exclusive content.	https://app.mintgate.io/admin	https://twitter.com/mintgate_io
43	ORCA	TOKEN GRATING	Orca enables DAOs to implement pods. Pods give users a clean and easy-to-use UI to create and approve proposals within a small working group and allow DAOs to create organizational structure. From the user's perspective, a pod is a clean and easy-to-use interface for multi-signs. Under the hood, a pod is a Gnosis Safe with a light governance wrapper.	https://www.orcaprotocol.org/	https://twitter.com/OrcaProtocol
44	Collab.land	TOKEN GRATING	Collab.Land is a Discord bot that manages token-gated channels and roles. It includes functionality to: Verify whether a user owns a given digital asset (ERC token) necessary to enter a given channel or have a certain role, and if they do, give them access. Automatically kick a user out of a gated channel or role if they sell or otherwise get rid of the token required to be in it. Tip other users within a server.	https://collab.land/	https://twitter.com/Collab_Land_
45	GUILD	TOKEN GRATING	In less than a minute, create a private Discord space for a community based on an NFT, ERC-20 token, POAP, or a combination of them all. Let's say a user wants to connect community members around an NFT or token. In a few clicks, Guild enables users to spin up a token/NFT/POAP gated Discord channel for members. Members visit an organization's Guild page, connect their wallets, and if they hold that specific asset in their wallet, they will be granted access to the Discord. Users can also create a Guild that blends communities. For example, we could create a Guild for members of FWB and DAO Masters. In this case, the Guild would require members to hold 75 FWB tokens + 1 DAOMSTR in their wallets	http://alpha.guild.xyz/	https://twitter.com/guildxyz
46	DISPERSE	CONTRIBUTION	disperse is a simple and elegant solution to help DAOs batch payments or airdrops.	https://disperse.app/	
47	PARCEL	CONTRIBUTION	In less than a minute, create a private Discord space for a community based on an NFT, ERC-20 token, POAP, or a combination of them all. Let's say a user wants to connect community members around an NFT or token. In a few clicks, Guild enables users to spin up a token/NFT/POAP gated Discord channel for members. Members visit an organization's Guild page, connect their wallets, and if they hold that specific asset in their wallet, they will be granted access to the Discord. Users can also create a Guild that blends communities. For example, we could create a Guild for members of FWB and DAO Masters. In this case, the Guild would require members to hold 75 FWB tokens + 1 DAOMSTR in their wallets	https://parcel.money/	https://twitter.com/parcelHQ
48	COINWISE	CONTRIBUTION	Coinwise is an open platform on Ethereum where creators can launch and build a tokenized community. Creators can: Create their own social token on a fixed supply, bonding curve or vesting schedule. Airdrop social tokens via a unique claimable link or to a list of addresses. Reward their community for contributions using bounties paid with community tokens or major coins including ETH and USDC. Provide vesting schedules for core contributors. Discover and grow their communities, communicate and contribute towards other creators	http://coinwise.co/	https://twitter.com/CoinwiseCo
49	OPOLIS	CONTRIBUTION	Coinwise is an open platform on Ethereum where creators can launch and build a tokenized community. Creators can: Create their own social token on a fixed supply, bonding curve or vesting schedule. Airdrop social tokens via a unique claimable link or to a list of addresses. Reward their community for contributions using bounties paid with community tokens or major coins including ETH and USDC. Provide vesting schedules for core contributors. Discover and grow their communities, communicate and contribute towards other creators	https://opolis.co/	https://twitter.com/opolis
50	WONDERVERSE	CONTRIBUTION	This DAO native tool is a platform which combines critical pieces to manage participation in a DAO. Primarily a project management tool integrated into crypto, it strives to be a one stop shop for all things DAO participation.	https://www.wonderverse.xyz/	https://twitter.com/wonderverse_xyz

51	SOURCECRED	CONTRIBUTION	SourceCred makes the labor of individuals more visible and rewardable as they work together in a project or community. Taking inspiration from Google's PageRank algorithm, SourceCred uses both objective and subjective measures to accurately capture and update an individual contributor's impact on a project.	https://sourcecred.io/	https://twitter.com/Sourcecred
52	COORDINAPE	CONTRIBUTION	Gardens is a platform, created by 1Hive, that allows DAO members to submit, support or challenge proposals. To participate, DAO members must sign a Community Covenant, a document that states the rules, mission and vision of the DAO. Signing it signals that a member agrees with the values of the DAO and unlocks access to the governance features. Gardens uses 'Conviction Voting', a novel governance method that is based on the length of time that voters indicate their preference for a particular action, rather than requiring a yes/no vote. Proposals can be challenged and escalated to a dispute management system called 'Celeste', made up of a decentralized, randomly selected group of independent arbiters. DAO governance tokens can be generated using Gardens or imported	https://coordinape.com/	https://twitter.com/coordinape
53	GARDENS	VOTING	Gardens is a platform, created by 1Hive, that allows DAO members to submit, support or challenge proposals. To participate, DAO members must sign a Community Covenant, a document that states the rules, mission and vision of the DAO. Signing it signals that a member agrees with the values of the DAO and unlocks access to the governance features. Gardens uses 'Conviction Voting', a novel governance method that is based on the length of time that voters indicate their preference for a particular action, rather than requiring a yes/no vote. Proposals can be challenged and escalated to a dispute management system called 'Celeste', made up of a decentralized, randomly selected group of independent arbiters. DAO governance tokens can be generated using Gardens or imported	https://gardens.1hive.org/#/home	https://twitter.com/earnfinance
54	OPEN LAW	VOTING	OpenLaw is an online legal contracts portal which provides users with a blockchain-based protocol to create 'smart' legal documents. The OpenLaw platform can be used to create smart contracts and record them on the Ethereum blockchain.	https://www.openlaw.io/	https://twitter.com/squiggledao
55	BOARDROOM	VOTING	The Boardroom Governance portal, powered by Boardroom's API, is a governance framework agnostic interface that enables DAOs to standardize common actions like voting and delegation and enable DAO members to easily participate in distributed governance.	https://www.boardroom.info/	https://twitter.com/sevensgrant
56	SNAPSHOT	VOTING	Snapshot is a decentralized voting system that allows users to create proposals and vote off-chain. Snapshot allows users to choose from multiple voting systems and use ERC-20s or NFTs to calculate voting power.	https://snapshot.org/#/	https://twitter.com/sablierhq
57	TALLY	VOTING	Tally is a voting and governance analysis tool that allows members of a protocol DAO (e.g. Compound, Uniswap, or Gitcoin, etc.) to vote on active on-chain proposals, delegate votes to a third party, or view previous proposals. It also shows the outcomes of previous proposals, allowing the public to see who voted; what percentage of voting rights they own; and whether they voted for, against, or abstained from a proposal, bringing transparency to the voting process. Users can see governance activity across all the DAOs they're participating in on their dashboard.	https://www.withtally.com/	https://twitter.com/tryrollhq
58	COORDINAPE	COMPENSATION	Gardens is a platform, created by 1Hive, that allows DAO members to submit, support or challenge proposals. To participate, DAO members must sign a Community Covenant, a document that states the rules, mission and vision of the DAO. Signing it signals that a member agrees with the values of the DAO and unlocks access to the governance features. Gardens uses 'Conviction Voting', a novel governance method that is based on the length of time that voters indicate their preference for a particular action, rather than requiring a yes/no vote. Proposals can be challenged and escalated to a dispute management system called 'Celeste', made up of a decentralized, randomly selected group of independent arbiters. DAO governance tokens can be generated using Gardens or imported	https://coordinape.com/	https://twitter.com/rally_io
60	DISPERSE	COMPENSATION	disperse is a simple and elegant solution to help DAOs batch payments or airdrops.	https://disperse.app/	https://twitter.com/proofofhumanity
61	PARCEL	COMPENSATION	In less than a minute, create a private Discord space for a community based on an NFT, ERC-20 token, POAP, or a combination of them all. Let's say a user wants to connect community members around an NFT or token. In a few clicks, Guild enables users to spin up a token/NFT/POAP gated Discord channel for members. Members visit an organization's Guild page, connect their wallets, and if they hold that specific asset in their wallet, they will be granted access to the Discord. Users can also create a Guild that blends communities. For example, we could create a Guild for members of FWB and DAO Masters. In this case, the Guild would require members to hold 75 FWB tokens + 1 DAOMSTR in their wallets	https://parcel.money/	https://twitter.com/PleasrDAO
62	COINWISE	COMPENSATION	Coinwise is an open platform on Ethereum where creators can launch and build a tokenized community. Creators can: Create their own social token on a fixed supply, bonding curve or vesting schedule. Airdrop social tokens via a unique claimable link or to a list of addresses. Reward their community for contributions using bounties paid with community tokens or major coins including ETH and USDC. Provide vesting schedules for core contributors. Discover and grow their communities, communicate and contribute towards other creators	https://www.coinwise.co/	https://www.paladin.vote/
63	OPOLIS	COMPENSATION	Opolis allows independent workers (such as freelancers, gig workers, and DAO contributors) to access benefits typically reserved for corporations (ex, medical insurance and retirement plans.)	https://opolis.co/	https://twitter.com/OlympusDAO
64	WONDERVERSE	COMPENSATION	This DAO native tool is a platform which combines critical pieces to manage participation in a DAO. Primarily a project management tool integrated into crypto, it strives to be a one stop shop for all things DAO participation.	https://www.wonderverse.xyz/	https://twitter.com/molochdao
65	SOURCECRED	COMPENSATION	SourceCred makes the labor of individuals more visible and rewardable as they work together in a project or community. Taking inspiration from Google's PageRank algorithm, SourceCred uses both objective and subjective measures to accurately capture and update an individual contributor's impact on a project.	https://sourcecred.io/	https://twitter.com/fyoozapp
66	Yearn.finance	GOVERNANCE	yearn.finance is a group of protocols running on the Ethereum blockchain that allow users to optimize their earnings on crypto assets through lending and trading services.	https://www.fwb.help/	https://twitter.com/FWBtweets
67	FAIRMINT	COLLECTOR DAO	A community-driven digital art house.	https://www.fairmint.co/	https://twitter.com/fairmintCO

68	Sevens foundation	GRANTS	Sevens Foundation provides both artists and curators tools for creating opportunities to connect through art exhibitions.	https://enzyme.finance/	https://twitter.com/enzymefinance
69	Sablier	COMPENSATION	Sablier leverages smart contracts to offer a continuous, autonomous, trustless payment solution. This means that you earn money each second, for the entirety of the life of an agreement.	https://duckdao.io/	https://twitter.com/dao_duck/
70	ROLL	TOKEN CREATION	Social token infrastructure	https://dreamdao.xyz/	https://twitter.com/dreamdao_
71	Rally	TOKEN CREATION	a social platform that allows content creators to issue tokens	https://deepdao.io/	https://twitter.com/DeepDAO_io
72	Proof of humanity	IDENTITY	a system combining webs of trust, with reverse Turing tests, and dispute resolution to create a sybil-proof list of humans	https://daostack.io/	https://twitter.com/daostack
73	Pleasr DAO	COLLECTOR DAO	an art collecting empire, the DAO is experimenting with novel concepts in digital and community art ownership. Its members are exploring ideas such as fractionalizing iconic pieces to be distributed to, and owned by, the community.	https://commonwealth.im/	https://twitter.com/hicommonwealth
74	Paladin	COMPENSATION	a decentralised reserve currency protocol available on the BSC (Binance Smart Chain) based on the Pal token	https://coinshift.xyz/	https://twitter.com/0xCoinshift
75	Olympus	TREASURY MANAGEMENT	Olympus is building a community-owned decentralized financial infrastructure to bring more stability and transparency for the world.	https://www.brightid.org/	https://twitter.com/BrightIDProject
76	Moloch DAO	GRANTS	a Decentralized Autonomous Organization, deployed on Ethereum mainnet. Members contribute capital with the sole intention of giving it all away to fund Ethereum infrastructure as an essential digital public good.	https://www.brightmoments.io/	https://twitter.com/brtmoments
77	Fyooz	TOKEN CREATION	social tokens that is generated from a smart contract deployment on the Ethereum blockchain	https://aavegrants.org/	https://twitter.com/aavegrants
78	Friends with benefits	SOCIAL	It is a decentralized digital payment project focused on offering faster transactions in comparison to Bitcoin.	https://commonwealth.im/	https://twitter.com/hicommonwealth
79	Fairmint	FUNDRAISING	Fairmint gives founders the opportunity to turn their equity into the most powerful tool to engage with their stakeholders.	https://www.fairmint.co/	https://twitter.com/fairmintCO
80	Enzyme	TREASURY MANAGEMENT	Enzyme is a decentralised asset management infrastructure built on Ethereum. Using Enzyme Smart Vaults, individuals and communities can build, scale and monetise investment (or execution) strategies that employ the newest innovations in decentralised finance.	https://enzyme.finance/	https://twitter.com/enzymefinance
81	Duck DAO	INVESTING	a decentralized incubator that helps promising projects achieve their full potential by leveraging the investment power and buzz making potential of our community.28	https://duckdao.io/	https://twitter.com/dao_duck/
82	Dream DAO	GRANTS	invests in the future of the web3 x social impact ecosystem by providing diverse Gen Zers around the globe with the training, funding, and mentorship they need to leverage the power of web3 to secure a brighter future for humanity.	https://dreamdao.xyz/	https://twitter.com/dreamdao_
83	DeepDAO	ANALYTICS	provides DAO analytics which list, track, visualize and analyze data about DAOs.	https://deepdao.io/	https://twitter.com/DeepDAO_io
84	DAO stack	GOVERNANCE	an open source project advancing the technology and adoption of decentralized governance.	https://daostack.io/	https://twitter.com/daostack
85	Commonwealth	GOVERNANCE	Commonwealth is an all-in-one platform for on-chain communities to discuss, vote, and fund projects together.	https://commonwealth.im/	https://twitter.com/hicommonwealth
86	Coinshift	TREASURY MANAGEMENT	Smart treasury management for crypto organizations	https://coinshift.xyz/	https://twitter.com/0xCoinshift
87	BrightID	IDENTITY	a social identity network that allows people to prove to applications that they aren't using multiple accounts.	https://www.brightid.org/	https://twitter.com/BrightIDProject
88	Bright moments	SOCIAL & NFT	exploring the intersection of NFTs, real-world spaces, entertainment, and onboarding new crypto enthusiasts.	https://www.brightmoments.io/	https://twitter.com/brtmoments
